*Introducing The Newest Technology in
Water Purification System*

Jantzen Bacteria Free Water Purification System
The solution to your household water problems

US NANO TECHNOLOGY UF 5030A

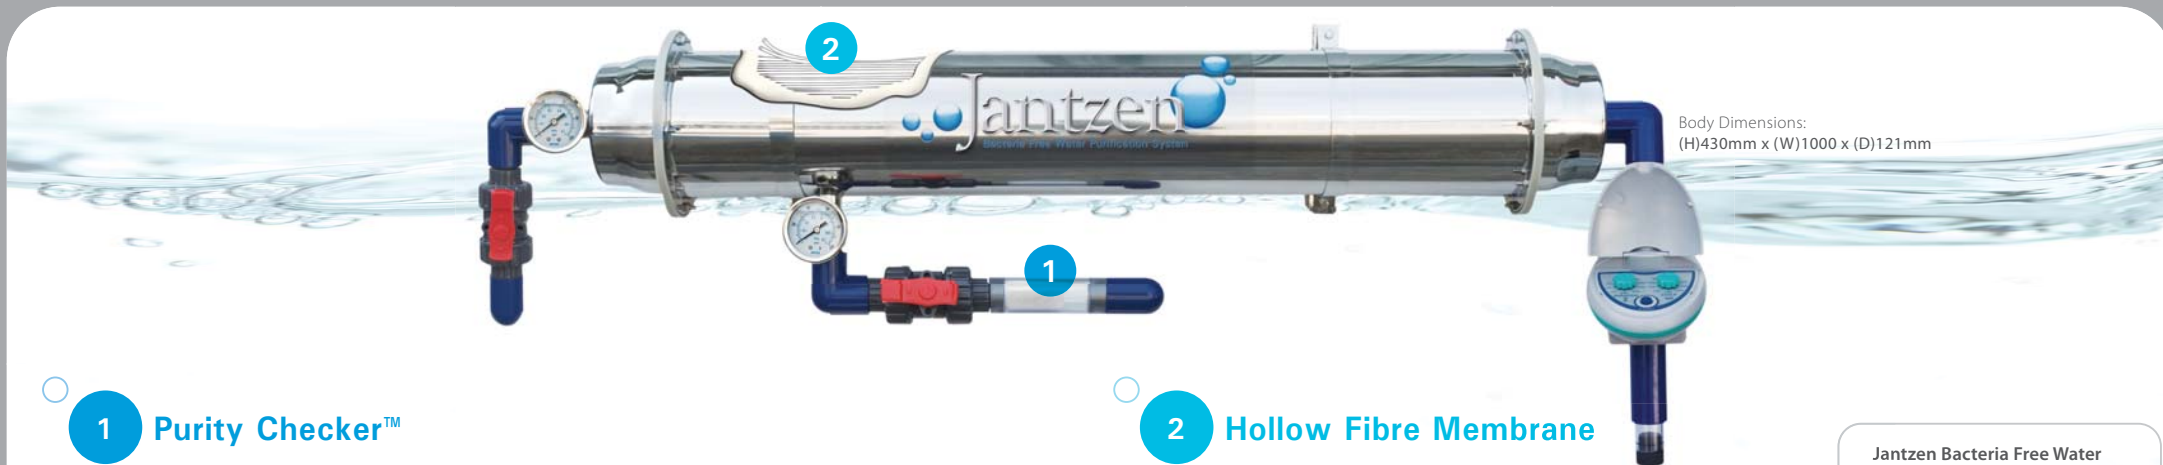

Jantzen Bacteria Free Water Purification System

1 Purity Checker™

2 Hollow Fibre Membrane

3 Quality Assurance

Body Dimensions:
(H)430mm x (W)1000 x (D)121mm

1 Purity Checker™

The ONLY water purification system in Malaysia with a "Purity Checker™"

What is a "Purity Checker™"?

- to show the cleanliness of the purified water
- to detect problems arising from the membrane

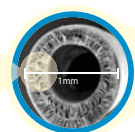

Why is it important to have a Purity Checker™?

- to know that the system is functioning as it should
- to gauge when to change the membrane

2 Hollow Fibre Membrane

2-Layer Membrane of Microscopic Pores

External Diameter: 1mm

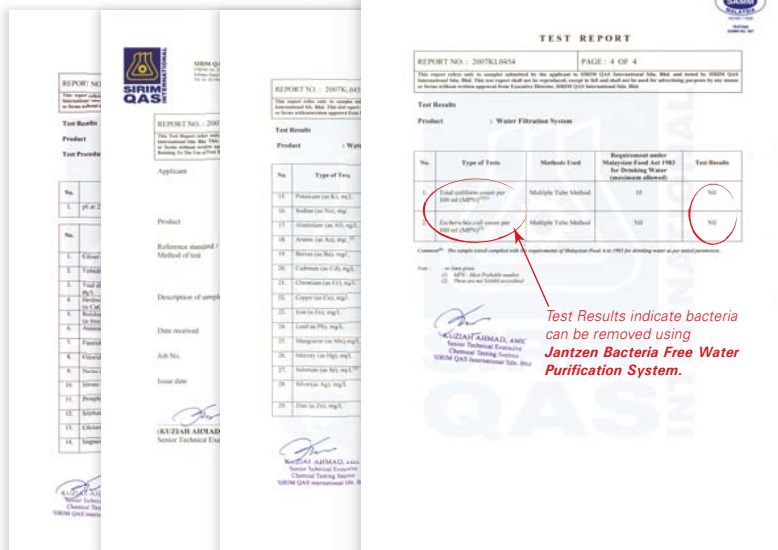

Membrane Pore Size: 0.01 Micron

Jantzen Bacteria Free Water Purification System consists of hollow fibre membrane that has billions of microscopic pores with a size of 0.01 micron. It effectively blocks contaminants such as dirt, bacteria, parasites and viruses from entering your household water at point of entry.

3 Quality Assurance

Test Results indicate bacteria can be removed using Jantzen Bacteria Free Water Purification System.

Jantzen Water Purification System has been tested by SIRIM & we guarantee you quality assurance of filtered water similar to bottled water.

Molecule Size Comparison

(micron unit) Micrometer		Common Items	Filtration Ability
100	Raw Water	Coal, Dirt, Particles, Sand	Jantzen Bacteria Free Water Purification System effectively blocks and removes particles larger than 0.015 microns from your water supply.
10		Mist, Pollen, Hair	
1.0		Yeast, Blood, Cells, Flour, Bacteria	
0.1		<i>Vibrio Cholerae</i> , <i>E. Coli</i>	
0.01	Jantzen Water Purification System	Dust, Virus (0.02-0.4 microns)	Dissolved salts and essential minerals pass through freely.
0.001	Quality Filtered Water	Dissolved Salts, Essential Minerals	

Comparison of Jantzen Bacteria Free Water Purification System with Sand & Fibre Filtration

	Jantzen Water Purification System	Sand Filtration	Fibre Filtration
Rust, mud, silt & other particles removal ability	0.01 microns	20-50 microns	10-20 microns
Bacteria & Virus removal	Yes	No	No
Suspended solids removal efficiency	>99%	60% - 80%	60% - 80%
Media Replacement Frequency	5 years	1-2 years	1 year
Flushing / Backwash	Automatic	Complicated	Complicated
